Table 1: list of services

Document contents

Every documents may have an action list and a service state table.

The action list includes all supported actions and their parameters belonging to the title topic of the document.

The service state table contains all parameters and their types. Additionally the allowed range or default values are also listed here.

Below you find examples for an action and a trimmed service state table.

Argument name	Direction	Related state variable	Remarks
NewProvisioningCode	in	ProvisioningCode	

Table 2: Argument list of action SetProvisioningCode

Variable name	Allowed values (* == default)	Data type
ProvisioningCode		String

Table 3: Variable list
